NexWave at ET 2007 show

Tokyo, Japan – Nov 19th, 2007

Last week, NexWave was exhibiting at Embedded Technology 2007 show in Yokohama, the largest trade show and conference for embedded system designers and managers.

This was the opportunity to demonstrate:

- NSI: component technology fully adapted to the embedded software industry
- NexGUI: small and extendable graphical API

These demonstrations could be shown both on NexWave's booth and on MontaVista presentation theatre.
